EDUCATION

Hack Reactor Remote
Advanced Software Engineering Immersive Program
2016

University of California, Irvine
Psychology, B.A.
2012

RECENT PROJECTS

Smitten - Software Engineer
A web app that streamlines communication between partners
just-smitten.herokuapp.com

- Developed mixtape feature using Angular 2, SoundCloud's API, and Redux-esque state management to allow users to search for songs, add songs to a shared playlist, and listen to playlist songs within the app
- Engineered persisting mixtape playlist by writing database queries and configuring flow of information between client and server using RESTful practices
- Designed, coded, and styled landing and mixtape pages to produce dynamic and user-friendly interfaces

Drama Queen - Software Engineer
A personal web app to keep track of the Korean dramas I've watched
dramaqueen.herokuapp.com

- Utilized TVDB API to retrieve and display information on various dramas
- Enabled user to save the dramas they've seen, along with their ratings, using MongoDB
- Integrated Redux with React to optimize data flow and provide predictable state changes within the app
- Employed test driven development to facilitate efficient creation of a robust codebase

AirShare - Software Engineer
A rental marketplace
github.com/heatherpark/AirShare

- Inherited and navigated through an existing codebase to create new features with AngularJS, Express, and MongoDB, providing a richer user experience
- Crafted scheduled email notifications using Nodemailer and Agenda to help users stay organized
- Designed a system that integrated Stripe's API to allow users to pay for their rentals

PROFESSIONAL EXPERIENCE

Intimina - Shanghai, China - 2015
Marketing Officer

- Increased Facebook page likes by 1000 using social media marketing strategies to create brand images
- Generated compelling content pertaining to women's health and wellness for search engine optimization purposes

Web2Asia - Shanghai, China - 2013-2015
E-Commerce Manager

- Utilized analytics for Baidu search and Tmall sales to guide brands in Chinese e-commerce market
- Became sole graphic designer of one of Web2Asia's long term clients after three months
